PR500 PNEUMATIC RIVET SETTING TOOL

USER INSTRUCTIONS

1

Choose the right nosepiece to suit the rivets to be set.

RIVETS	MARKING ON NOSE
3.0 / 3.2 mm	3.2 & 2.2 / B
4.0 mm	4.0 & 2.7 / C
4.8 / 5.0 mm	4.8 / 5.0 & 3.2 / E

2

Use the key provided to change the nosepiece.

**3**

Make sure that the collecting bottle is correctly attached to the machine.

**4**

Check that the air supply is within the pressure range 5 - 7 bars and connect the air supply to the air line.

5

Insert the mandrel of the rivet into the nosepiece and pull the trigger to crimp the rivet.

NB: this machine does not have a mandrel suction system after crimping.
